

2020 Tray Drench Flea Beetle Evaluation

MSU – Murray KY

- Tray drench treatments made 1 day prior to setting:
 - Admire Pro – 0.5 oz per 1000 plants
 - Verimark – 13.5 oz per acre
 - 2.7 oz per 1000 plants for a dark tobacco population of 5,000 plants per acre
 - Each treatment was uniformly applied to 2 trays (approx. 500 plants) and washed into root zone on June 17.
- KT D17LC dark tobacco set June 18
- Demonstration:
 - 4 rows 375 ft. long (140 plants per row)
 - 2 rows Admire Pro treatment, 2 rows Verimark treatment
 - 280 plants per treatment
 - Monthly fleabeetle counts made around 1, 2, and 3 months after setting (July, August, and September).

2020 Tray Drench Flea Beetle Evaluation MSU – Murray KY

*Flea beetle control from tray drench applications of Admire Pro or Verimark appeared to be similar.
